Virtual Desktop Infrastructure (VDI)

Overview

Allied Digital has over decades of experience in providing Remote Desktop management solution to leading enterprises across the globe. Our rich experience and expertise help us to move on to the next generation desktop management solution – Virtual Desktop Infrastructure (VDI).

Our Virtual Desktop is an end-to-end desktop management solution that reduces the barriers of acceptance - cost, complexity and coverage - traditionally associated with virtual desktop infrastructure (VDI) technology. It allows access to a personal PC desktop from anywhere anytime, using any device, using the Remote Desktop Environment from Virtual Bridges. We create centralized Virtual Desktop interface for you which help you to connect from anywhere and access with high end security to overcome from the following Challenges:

allied digital™

IT managed. Responsibly.

Why VDI ?

- Reducing the time and effort for new desktop procurement, deployment and maintenance.

- Managing the IT security and vulnerability at the end user level in a globalized environment.

- Maintaining patch compliance for desktop operating systems and applications.

- Providing secured and compliance remote access to outside vendors and contractors

Proven implementation framework to create a centrally-managed virtual desktop environment

Best-in-class storage technology-related offerings from our Storage Center of Excellence

Flexible deployment models, based on the client's cost and data privacy requirements

Delivery Methodology

Our VDI solution contributes significantly to minimize OPEX, CAPEX and overall TCO, and provide the following advantages:

- Reduce desktop management costs with the simplification and standardization of server hardware and client access devices

- Seamless deployment of patches and modifications to the virtual desktop from within the data center, mandating intervention for user acceptance and success

- Improved user satisfaction and productivity

- Better, easier and convenient management of desktop infrastructure
